Use of Learning Devices (LDs) in classroom

Learning and applying new concepts

The use of video recording allows students to look back on their problem solving process when they articulate their thoughts so that they are able to self-regulate

Students learn to mark their own work and uses voice recording to do reflection after they make changes to the 2nd draft.

Caring for Our Children as They Ease into Secondary School Life

Caring for Our Children as They Ease into Secondary School Life 21 December 2022

Teenage years are full of changes. As our children transit to secondary school, their lives will get busier, their circles of friends will expand, and we may even notice changes to the way they relate to us.
