MATHS ALIVE!
Workshop for Parents
Fri, 19 April 2024
(P1)

The materials shared in today's workshop are under the property of Junyuan Primary School, Mathematics Department.

Please **do not** take any photos or videos throughout the sharing.

Thank you for your understanding.

Objectives

- Partnership with parents to help their children to discover the joy of learning Mathematics.

Your kids aren't lazy; they just don't know how to revise independently

It is important for parents to find out why their kids procrastinate or are reluctant to hit the books. PHOTO: ISTOCKPHOTO

Elisa Chia

UPDATED MAR 15, 2024, 05:33 PM

Dr Lee, a former teacher attested : “There is no inherently ‘lazy’ kids.”

Dr Lee, a senior lecturer in Psychology and Child and Human Development at NIE commented that some kids may lack the drive to study and become disengaged.

By labelling unmotivated kids as lazy, incorrectly implying a flaw in their character.

Provide a distraction - free learning environment :

- Do not use your phone when you are at their study space as that will be distracting to them. Do your own work or reading.
- Take a supportive role, offering encouragement and being there if they have questions.

Main goal : To help your child to develop the skills and confidence to study independently as they advance in his /her education.

In this foundational stage in your child's formal schooling, it will be good if your child can work at being organised in getting ready for school.

Joy of learning Math - How ?

In Class:

- Factual Fluency
- SSM Activities (C-P-A Approach)
- JYPS Mathematical strategies
- Maths Around Us
- Thinking Aloud
- Maths HB / STAR Hpack
- MPB / Maths Ex. Book / Blue file
- Homelink Pack
- Maths Corner

Joy of learning Math - How ?

- Maths Corner

Factual Fluency

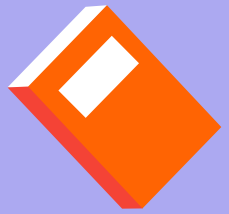
Maths **facts fluency** refers to the ability to recall basic mathematical **facts** in all four operations accurately, quickly and effortlessly.

Factual Fluency

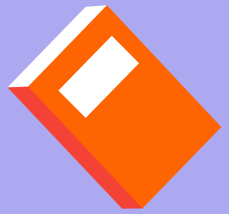
Why is it useful to master factual fluency?

When students achieve automaticity with these **facts**, they have attained a level of mastery that enables them to retrieve mathematical facts without conscious effort/attention. Automaticity is the ability to do things with an automatic response pattern or habit. It is usually the result of learning, repetition and practice.

**Factual Fluency is conducted on a frequent basis using students' mini whiteboard.*



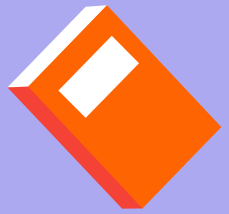
$$8 + 7$$



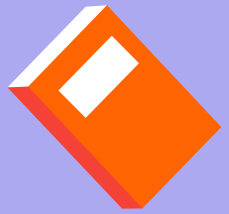
17 - 9

Make 20

16



_____ is 1 less than 10



1 + 9 + 2

Sustained Support for Maths Activities

Students learn Maths concepts through a series of activities using the CPA (Concrete – Pictorial – Abstract) approach to develop conceptual understanding. The activities hinge on the principles of early success, strong basics and steady progress. The focus is to provide students the learning experiences from concrete, to pictorial and then to abstract. This involves the use of manipulatives, songs, storybooks and touching on their daily experiences.

JYPS Mathematical Strategies

- We use VTR (Visible Thinking Routine) to uncover students' thinking about thinking
- It helps support lifelong learning
- It develops students' awareness of their own thinking (J. B. Biggs, 1987)
- It gives teachers an insight of students' misconceptions so teachers can address misconceptions accordingly

Visible Thinking Routine (VTR)

Making thinking visible through…

- See Think Wonder
- Chalk Talk
- I used to think…, Now I think
- What makes you say that?

Visible Thinking Routine

SEE THINK WONDER

- Helps students make careful observation
- Helps students develop their own ideas and interpretation based on what they see
- Encourages students to wonder and question, stimulating curiosity
- Helps students reach for new connections

Visible Thinking Routine

WHAT MAKES YOU SAY THAT?

- Students describe what they see or know
- Helps students build their explanations
- Promotes evidential reasoning as it invites students to share their interpretation
- Encourages students to understand alternatives and multiple perspective

Joy of learning Math - How ?

In Class:

- ✓ Factual Fluency
- ✓ SSM Activities (C-P-A Approach)
- ✓ JYPS Mathematical strategies
- ➡ Maths Around Us
- ➡ Thinking Aloud
- ★ Maths HB / STAR Hpack
- ★ MPB / Maths Ex. Book / Blue file
- ★ Homelink Pack
- ★ Maths Corner

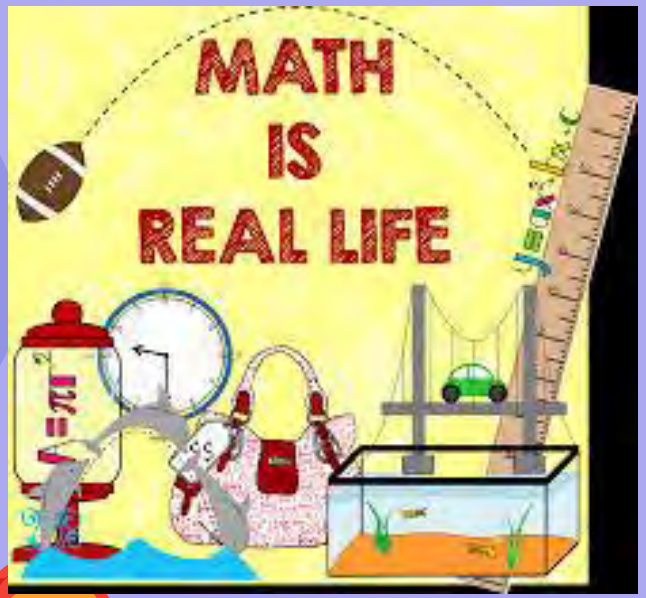
Thinking Aloud

- Provides opportunity for students to reason, think creatively and critically.
- Provides students the opportunity to take on a more active role of making sense of what they have learnt and to verbalise their learning with peers.

Maths Around Us

- Provides opportunity for students to articulate their understanding on how the concept is used in real world context
- This allows students to clarify their own thinking, deepen their reasoning, listen to others' reasoning and consolidate their understanding.

How to make Maths come alive?



Helping your child apply Maths concept in their daily lives, will bring meaning and joy in your child's learning.

Syllabus – Selected Topics

- Addition & Subtraction within 10
- Shapes
- Addition & Subtraction within 100
- Length
- Division
- Time
- Money

Addition and Subtraction within 10

Students are to be able to:

- understand concepts of addition, subtraction and their relationship
- use of + , - and =
- add and subtract within 10
- mental calculation involving adding and subtracting

Number Bonds

Why is it useful to master number bonds?

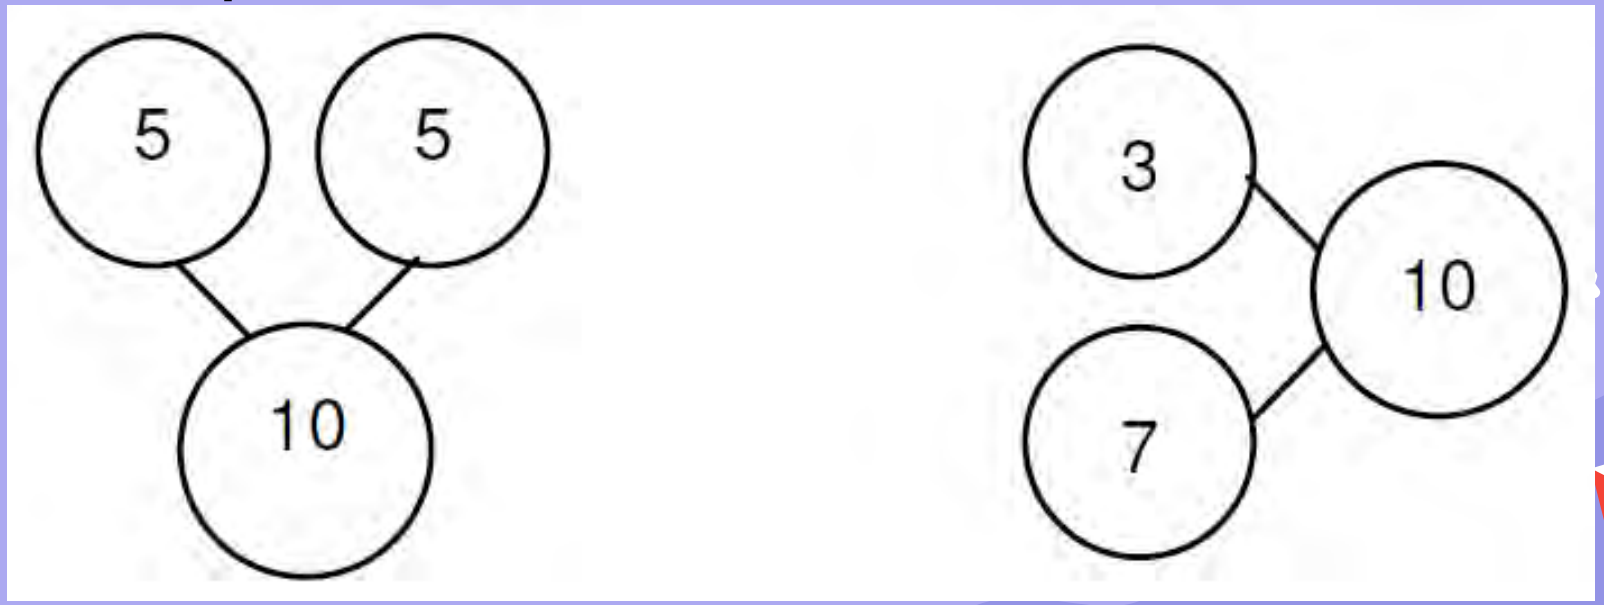
Helps students to master the basic addition and subtraction facts easily

Commit the number bond facts to memory.

Number Bonds

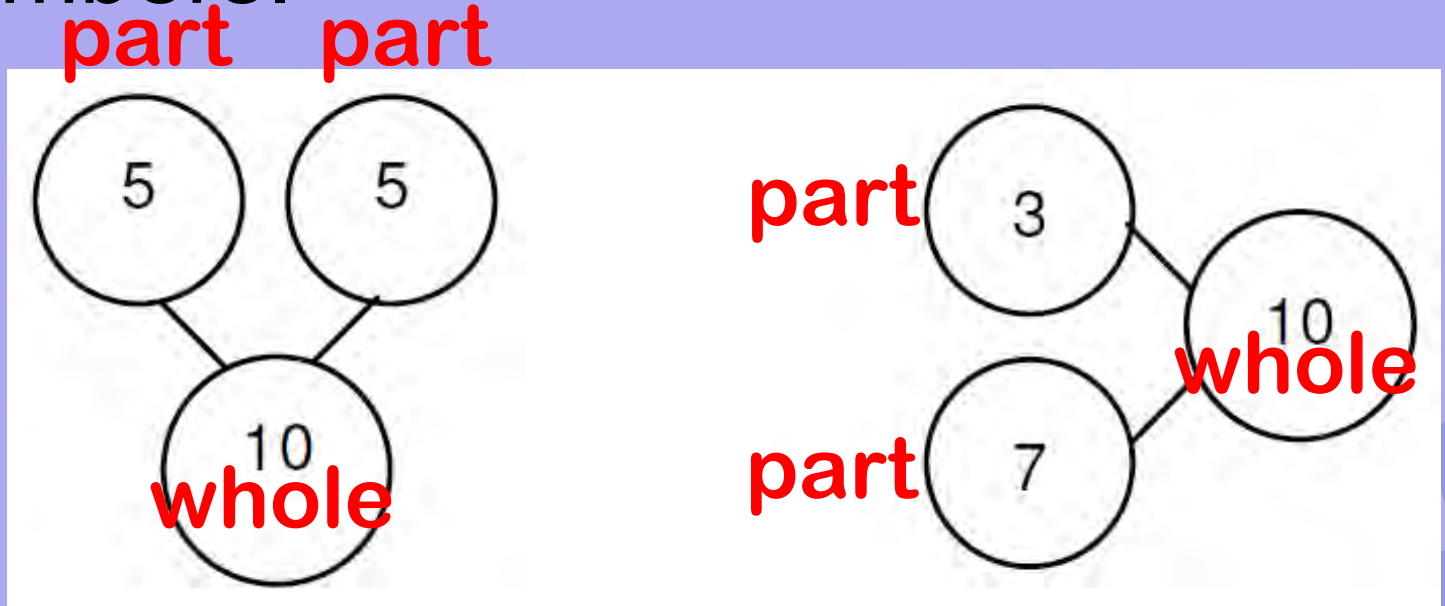
Different combinations of two numbers that make up a given number.

Example:



Number Bonds

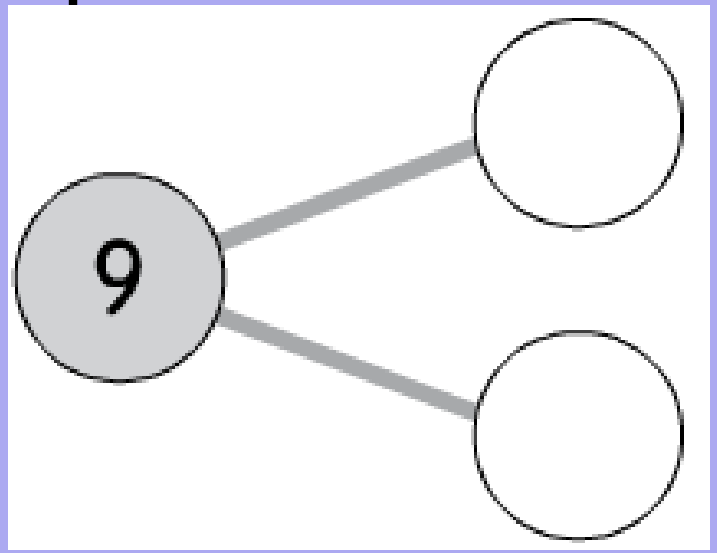
Each number bond represents a part-whole relationship between three numbers.



Number Bonds

Related to a family of four basic addition and subtraction facts.

Example of Fact Family



$2 + 7 = 9$

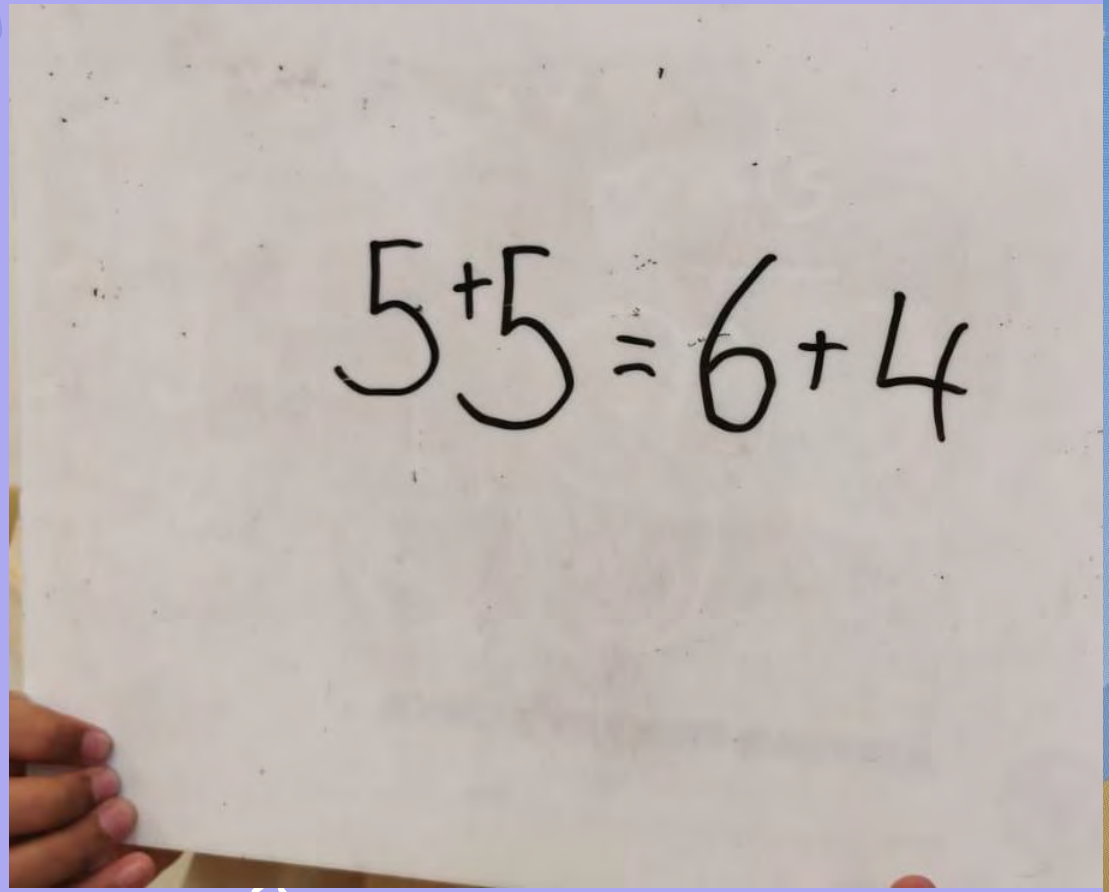
$7 + 2 = 9$

$9 - 7 = 2$

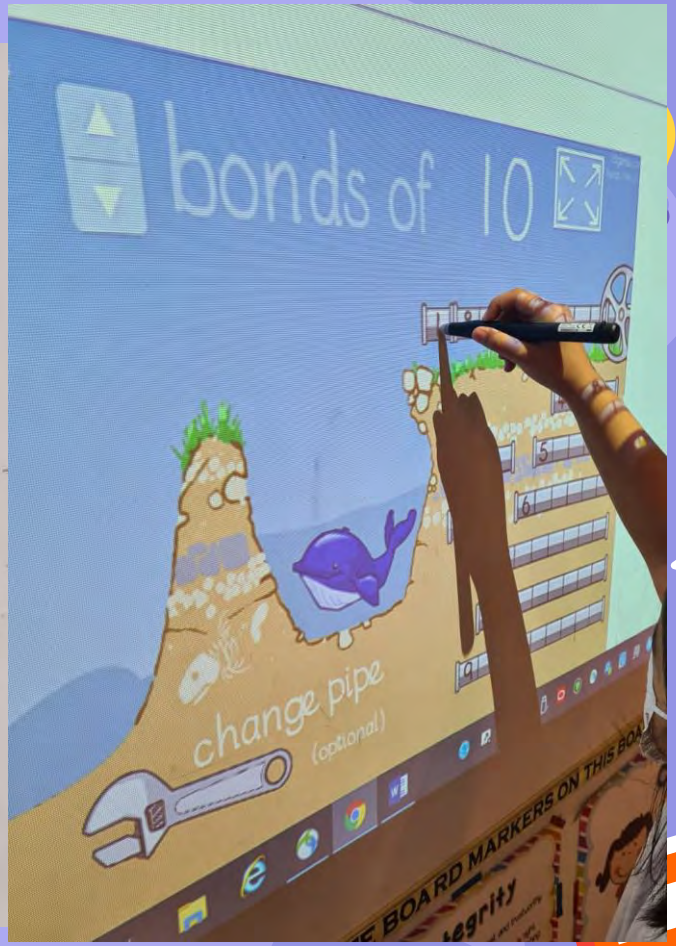
$9 - 2 = 7$

Number Bonds of 10

0 and 10 make 10	6 and 4 make 10
1 and 9 make 10	7 and 3 make 10
2 and 8 make 10	8 and 2 make 10
3 and 7 make 10	9 and 1 make 10
4 and 6 make 10	10 and 0 make 10
5 and 5 make 10	



5+5=6+4



bonds of 10
change pipe
(optional)

Maths Around Us - Subtraction Within 10

Before

?

After

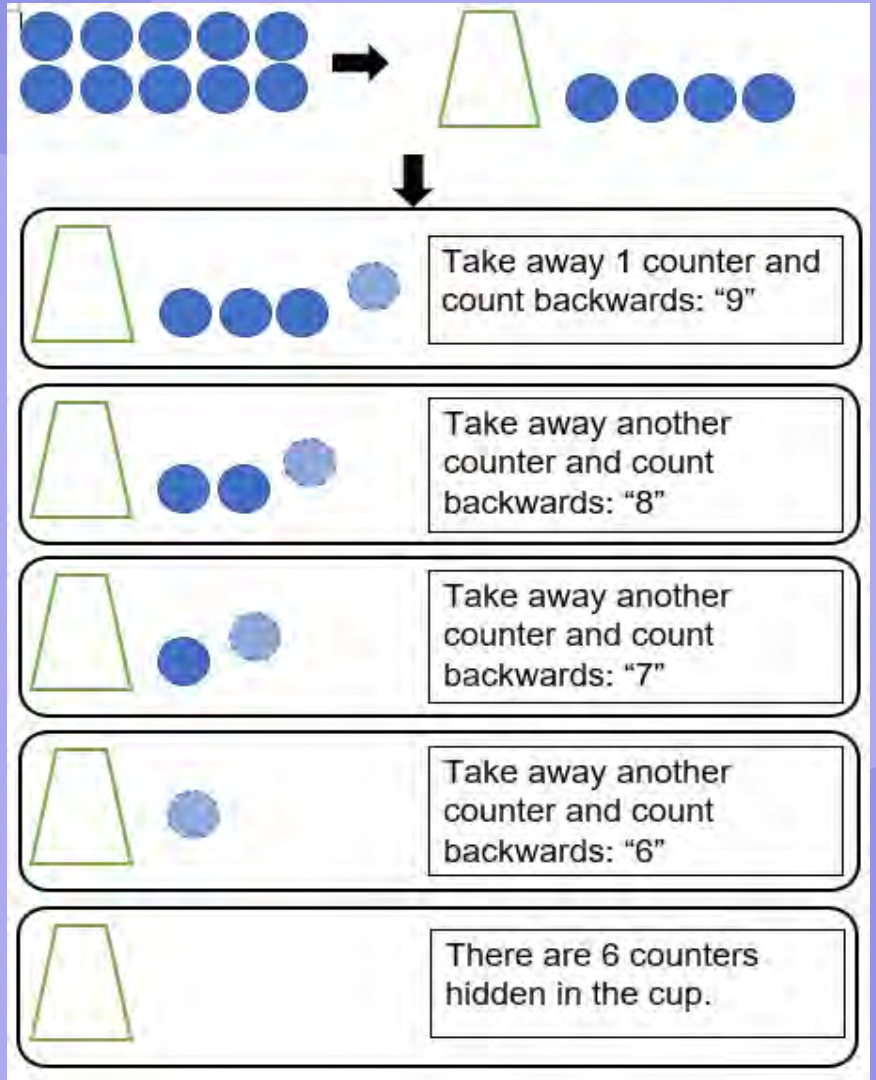
There are 7 people in the van.
2 people get off from the van.
There are 5 people left in the van.

Subtraction Within 10

Concept

- Subtraction as 'taking away' from a set using 'count back' strategy

Counting back to find number of counters in the cup



Thinking Aloud

Leila has 1 fewer mango than Jiahao.

Jiahao has 1 more mango than Ken.

What do you know about the number of mangoes each child has?

Using VTR "What makes you say that?"

Guiding questions

1. **If Leila has 8 mangoes, how many mangoes do Jiahao and Ken have? What makes you say that?**
2. **Try to replace the number of mangoes Leila has with other numbers within 10.**
3. **What can you learn from this activity?**

Answer

The difference will still be the same even if we use different numbers.

Shapes

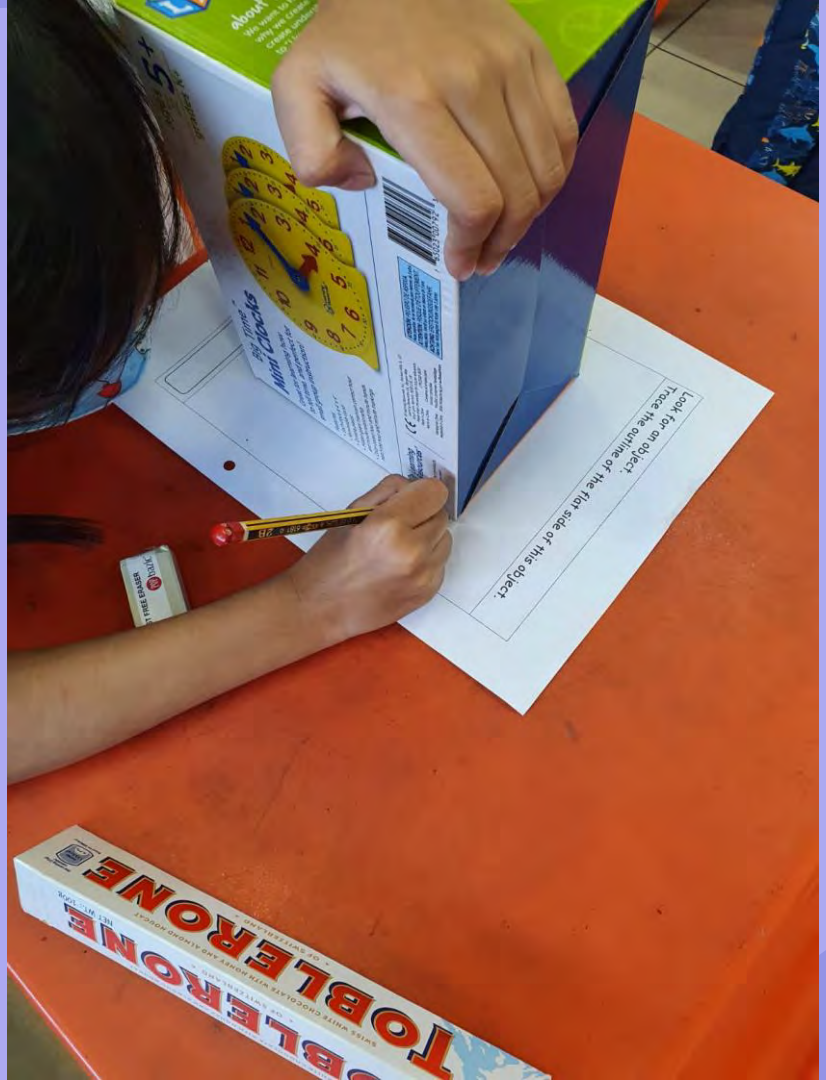
Students are to be able to:

- Identify and name 4 basic shapes

Shapes

Lesson Procedures

1. Students to touch & feel 3D objects.
2. Then, Students to find & trace the 4 basic shapes on the 3D objects on their Activity Sheet. Students to write the name of the shape identified.
3. Show Students' work on visualiser where they will discover how the traced figures are basic shapes though the objects are rotated.



Mini Clocks
TOBLERONE
TOBLERONE
Look for an object.
Trace the outline of the flat side of this object.

Maths Around Us

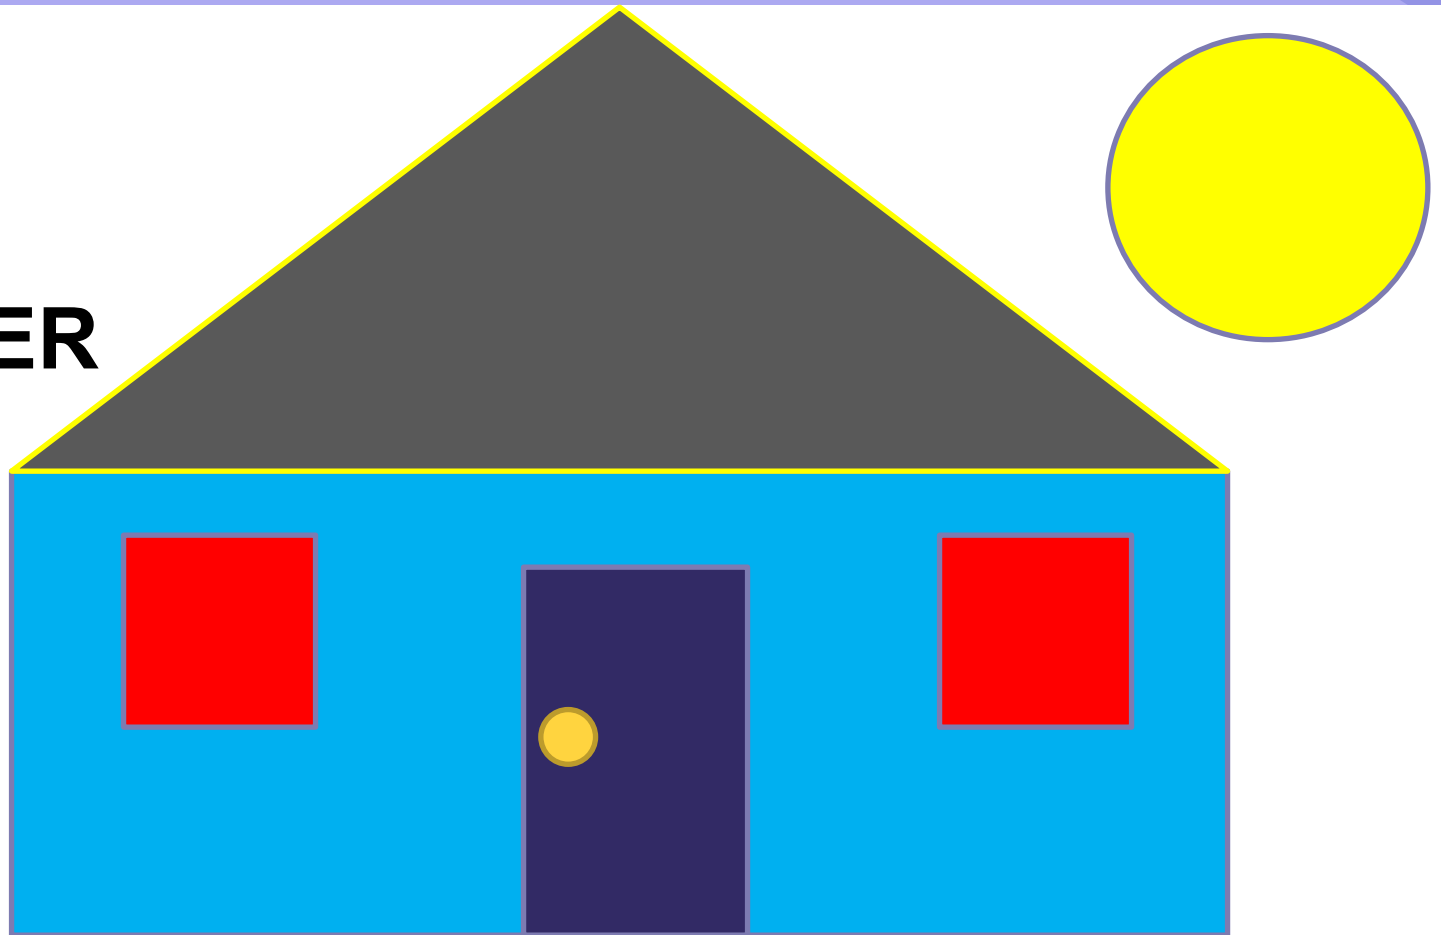
This is the newly built structure in our school. We can see shapes such as circles, squares and rectangles on this structure.

Thinking Aloud

SEE

THINK

WONDER



Addition and Subtraction within 100

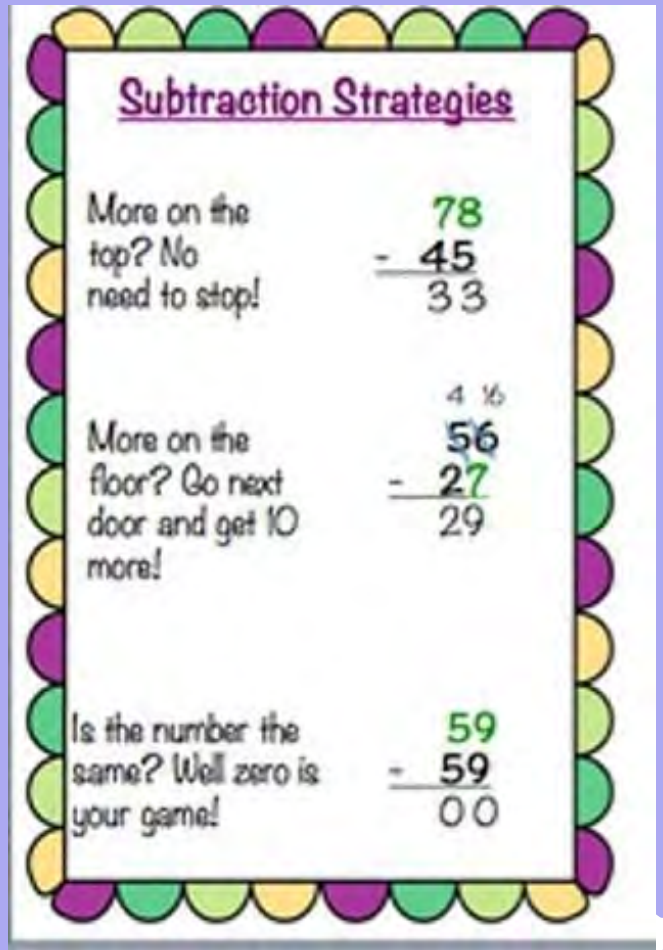
$$\begin{array}{r} 68 \\ -17 \\ \hline \end{array} \qquad \begin{array}{r} 63 \\ -17 \\ \hline \end{array}$$

Students are to be able to:

- add more than two 1-digit numbers
- add and subtract within 100
- use algorithm to add and subtract within 100
- mental calculate addition and subtraction within 20

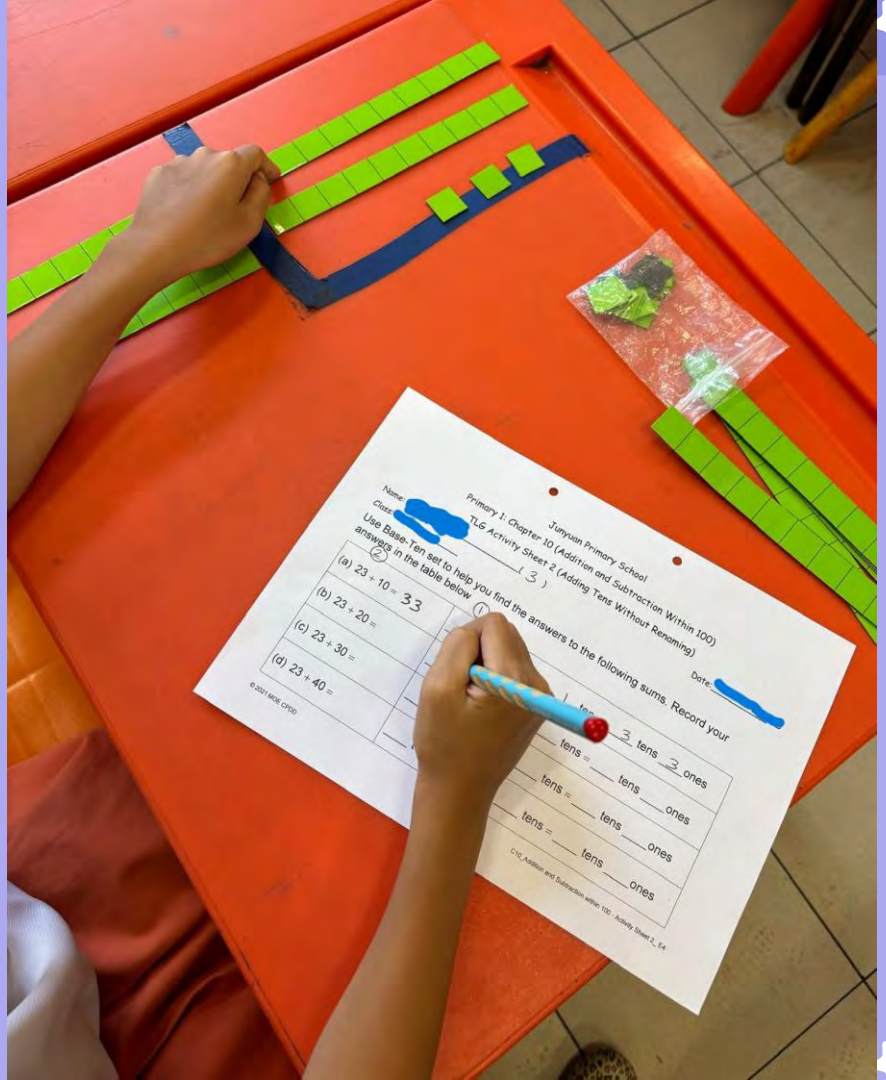
Addition Poem

Subtraction Poem



Example

Using of base 10 set to add tens without renaming



Addition & Subtraction

Example : 28 + 23

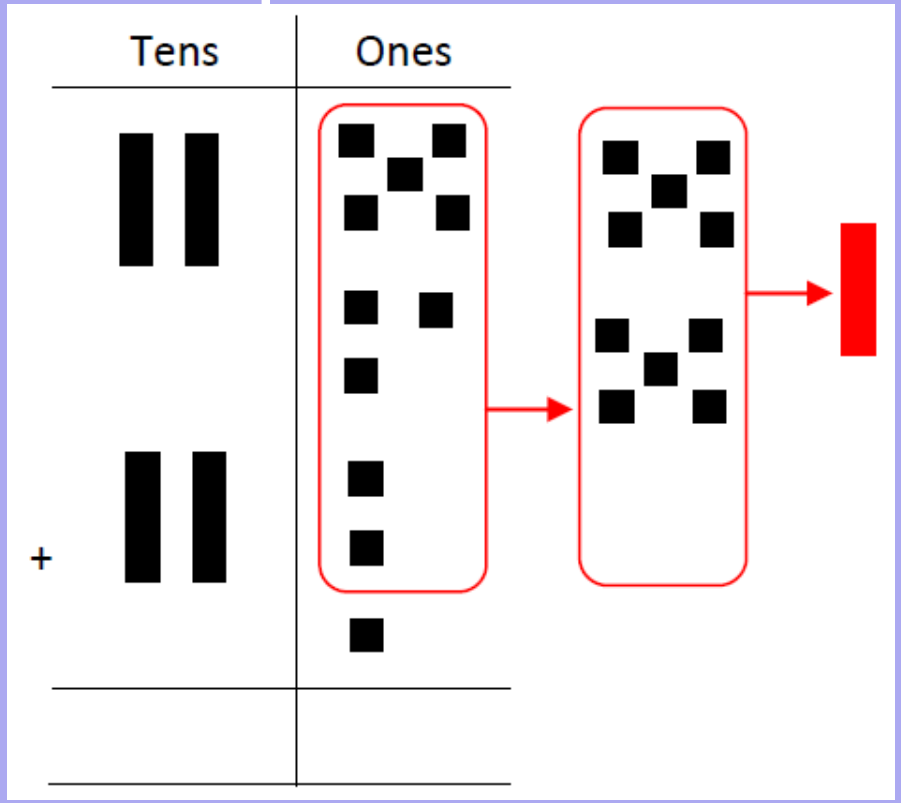
	Tens	Ones
		+		

Working

	Tens	Ones
	2	8
+	2	3

Addition & Subtraction

Example : 28 + 23



Renaming 10 ones into 1 ten

Addition & Subtraction

Example : 28 + 23

	Tens	Ones
		
+		

Working

	Tens	Ones
	1+ 2	8
+	2	3
	5	1

Addition & Subtraction

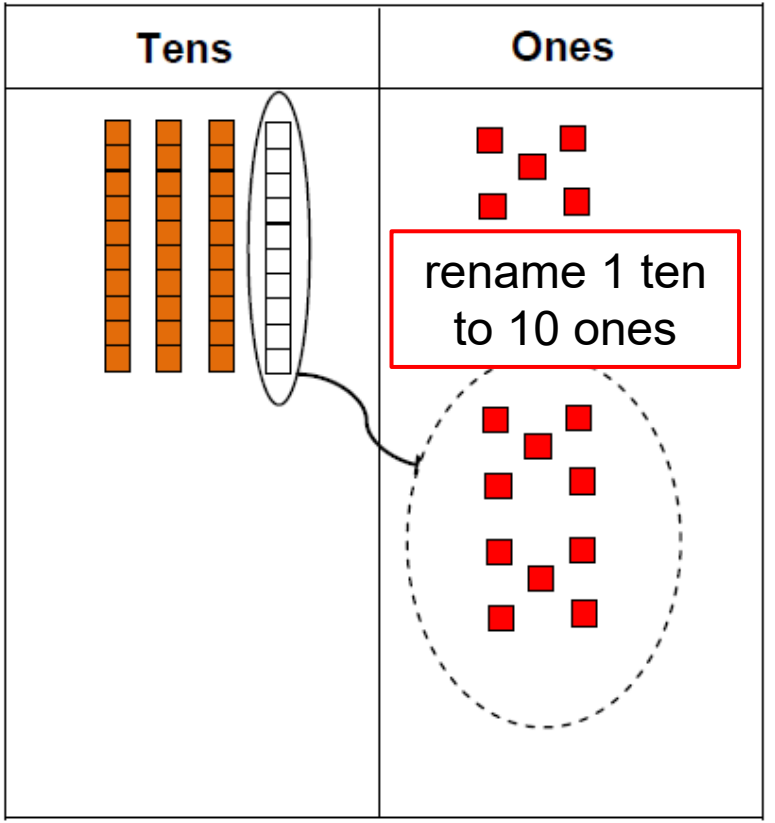
Example : 45 - 7

Tens	Ones
	
	Tens	Ones
	4	5
-		7

Addition & Subtraction

Example : 45 - 7

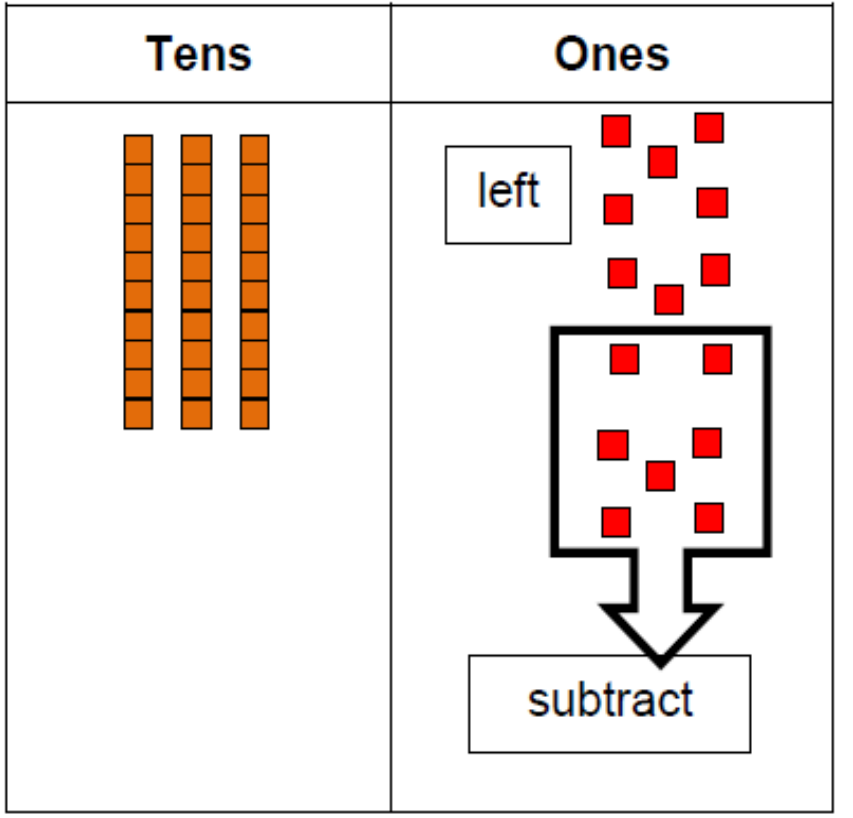
	Tens	Ones
	4	5
-		7



Addition & Subtraction

Example : 45 - 7

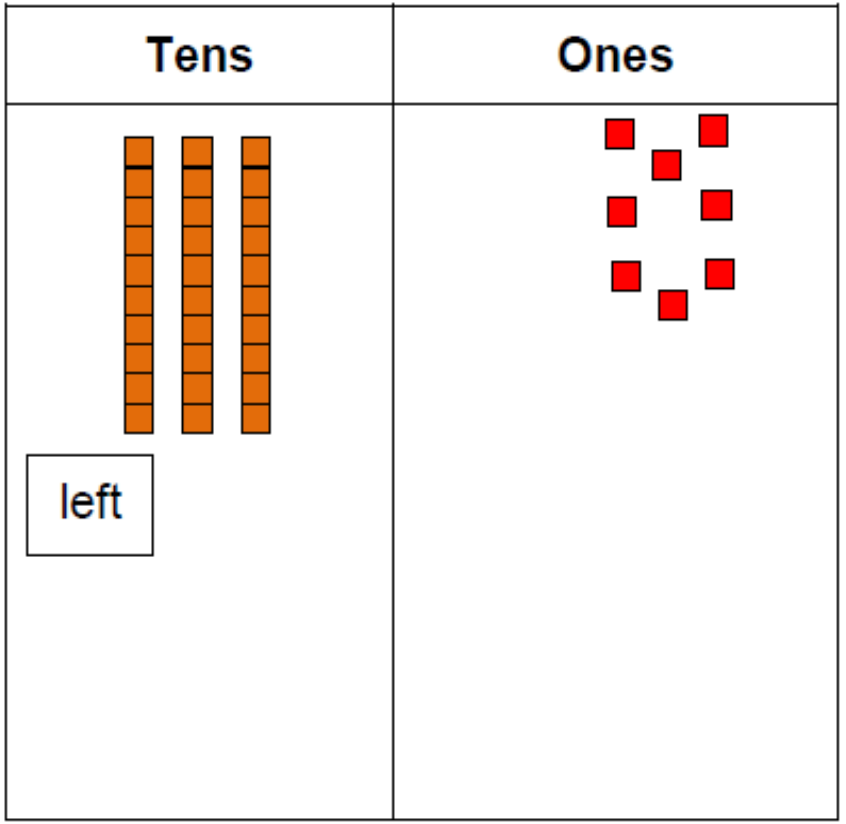
	Tens	Ones
	3 ~~4~~	15 ~~5~~
-		7
		8



Addition & Subtraction

Example : 45 - 7

	Tens	Ones
	3 ~~4~~	15 ~~5~~
-		7
	3	8



Maths Around Us

Look at what happens when a bus is at a bus stop.

1. What happens to the number of passengers when there are only passengers getting on?
2. What happens to the number of passengers when there are only passengers getting off?
3. When a bus is at the bus stop, can we know immediately if there are fewer or more number of passengers than before?
4. Write an addition/ & subtraction story when there are 50 passengers in the bus before it stopped at the bus stop.

Thinking Aloud

I see …

I wonder …

I think …

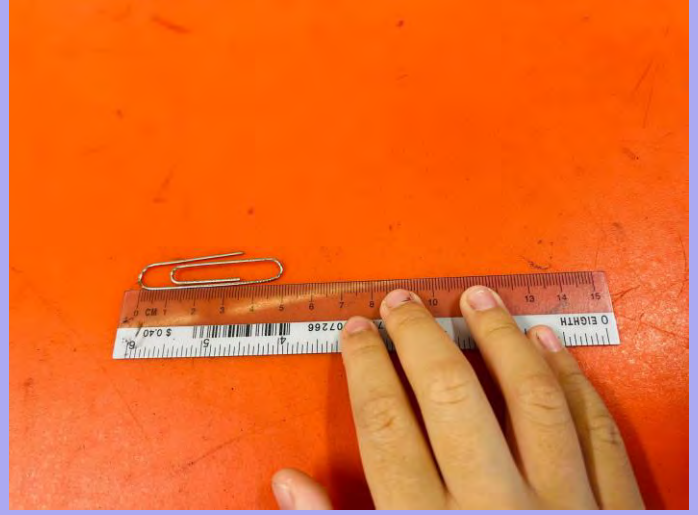
Siti wants to pack 6 lollipops into bags for the lucky draw winners at her birthday party. She has 3 bags to pack the lollipops equally into each bag.

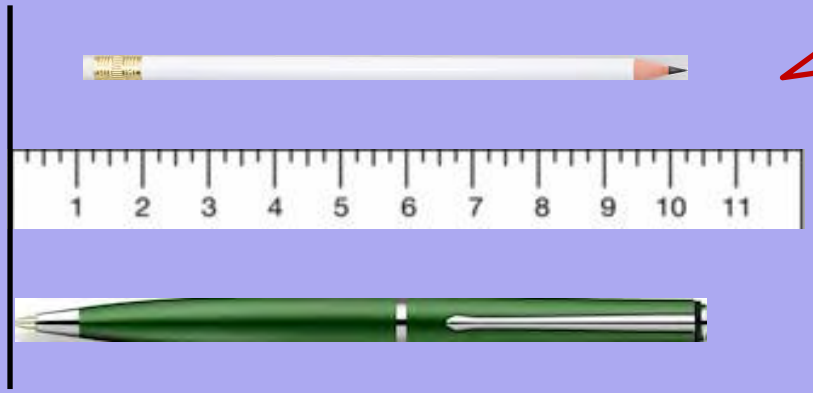
In how many different ways can Siti put the 6 lollipops into 3 different bags?

Length

Students are to be able to:

- Compare and order lengths in cm





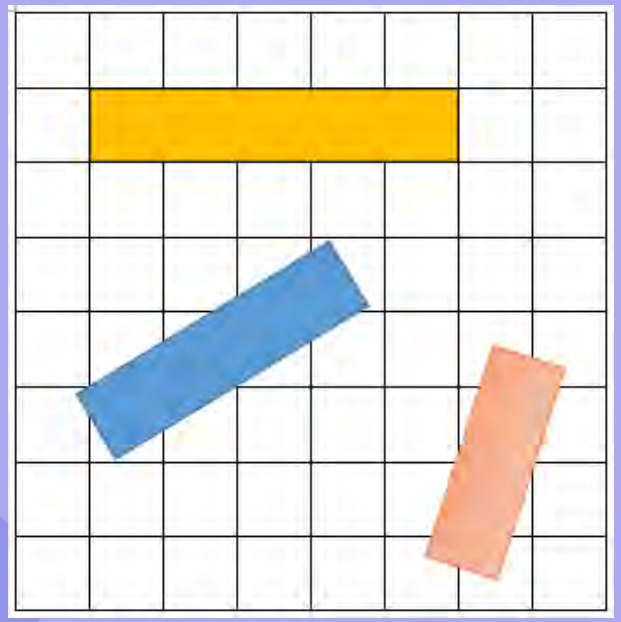
How would you describe the length of these objects? Which is the longest?

How do you know if these objects are of the same height?

Maths Around Us

Which measuring tool will you use to measure a soccer ball to find out if it can fit a locker?
Which measuring tool will you use to measure the whiteboard / your waist?
What makes you say that?

Thinking Aloud



What makes you say that the pink tape is the shortest?

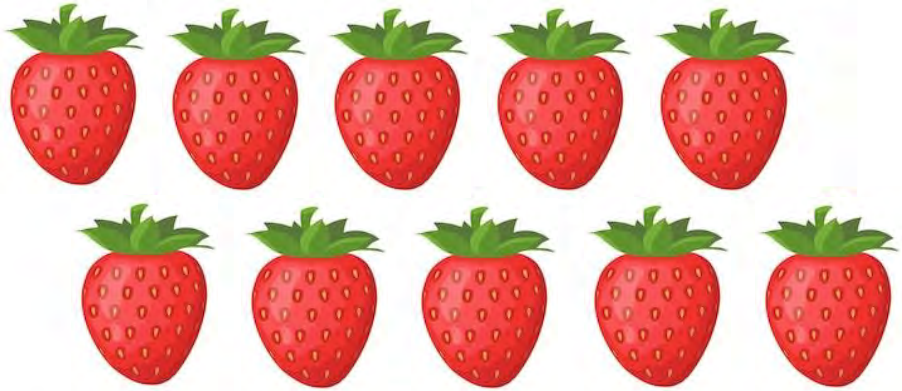
How can we measure the length around a round object?

Division

Students are to be able to:

- understand concepts of division
- divide within 20

Share 10 strawberries equally between 5 children.
How many strawberries does each child get?



Each child gets ____ strawberries.

Sharing concept

There are 20 dresses.
Put 5 dresses in a set.
How many sets are there?

There are ____ sets.

Grouping concept

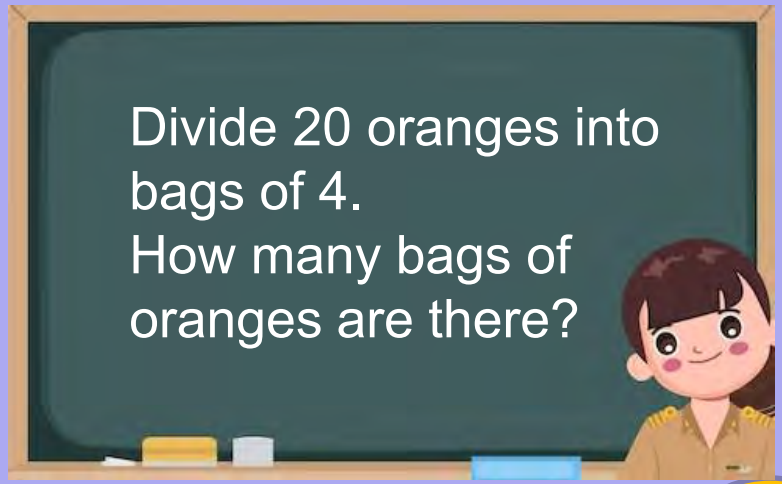
SSM

Maths Around Us

Party packs

You have 6 friends attending your birthday party. If you have 30 sweets, how many sweets should you give to each friend equally?

Thinking Aloud



What does it mean by ‘bags of 4’?

What makes you say that Ken is correct?

Jiahao: 4 + 4 + 4 + 4 + 4 = 20
There are 5 bags.

Ken: 5 groups of 4 make 20.
There are 5 bags.

Lella: There are 4 bags.
4 bags of 5 make 20.

Are the kids correct?

Time

Students are to be able to:

- tell time to 5 min
- use of ‘am’ and ‘pm’
- use of abbreviations h and min
- tell duration of one hour / half hour

Half an hour after 1

Half an hour after 2

Half an hour after 3

Half an hour after 4

Half an hour after 5

Half an hour after 6

Maths Around Us

Having a meal

- What time do we have breakfast?
- What part of the day is breakfast?

Thinking Aloud

An old lady knits with great speed.
30 minutes is all she needs.
She decorates her work with buttons for half an hour.
At 10:30, she is done.
What time did she start her knitting?

What do you see in the picture?

What do you think is happening?

What questions do you wonder about the scenario?

Money

Students are to be able to count amount of money:

- in cents up to $1
- in dollars up to $100

Adam paid this amount of money for a notebook.

How much did the notebook cost?

Show using play money.

Mary paid this amount of money for a doll.

10, 15, 16, 17 dollars

The doll cost $[ ].

Maths Around Us

Saving money

How much money do you have in your savings?
How much more money do you need to buy a toy?

Thinking Aloud

Who has more money?

I have 5 coins.
I have more money than you.

I have 4 coins.
I have more money than you.

How do you know?

Why do you think the boy says he has more money than the girl?

Who has more money?
Give me examples why you say that.

Joy of learning Math - How ?

- ⭐ Maths Corner

Maths HB

- Maths Handbook (HB) is created to help summarise important concepts students need to attain in each topic for each term.
- Provides students a form of revision. Some teachers keep the Maths HB in school for students to revise when they have completed their work.
- File handbook into the orange file
- Orange file is kept in class lockers to be used in class as fillers or kept at home for revision

Junyuan Primary School
Mathematics Handbook
Primary 1
(Term 1)

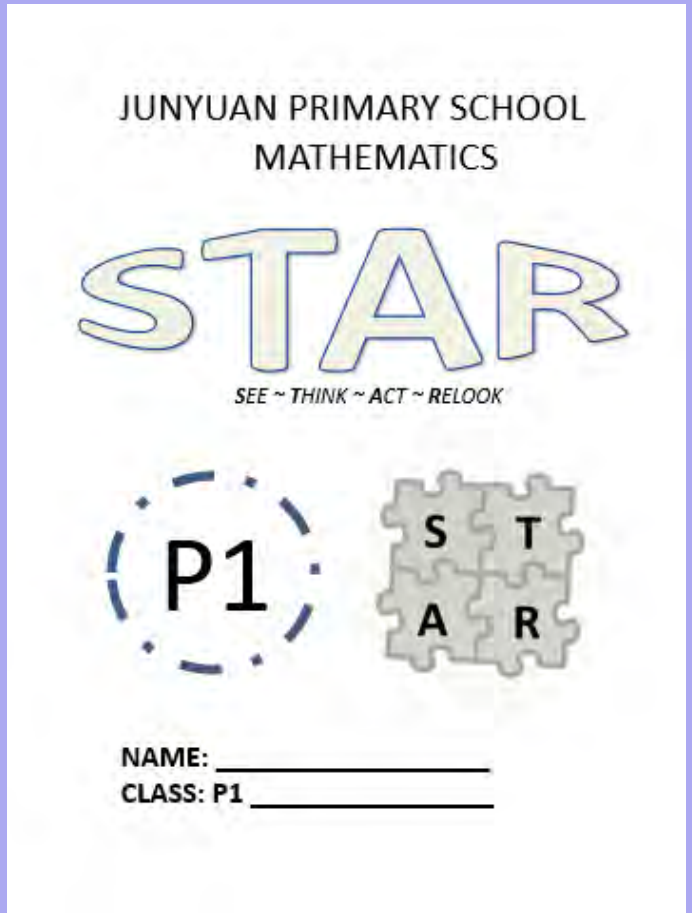
Name: _____

Class: Pr 1 _____

STAR Hpack

- STAR Heuristics Package (STAR Hpack) is created to teach students the methods to solve word problems.
- Develops students' logical thinking and ability to solve difficult problems.
- To be filed into blue file at the end of the year

Problem-Solving Approach: STAR



Starts in term 3

Problem-Solving Approach: STAR

See what is given

↓

Think of a plan

↓

Act on the plan

↓

Relook and Check

Problem-Solving Approach: STAR

Key Questions to ask when solving word problem

See (What is given?)	Think (What is my plan?)
1. Can I retell the problem in my own words? 2. What am I asked to find? 3. What are the key words?	1. Have I solved the same type of problem before? 2. What method(s) can I use? 3. Can I solve a part of the problem first?
Act (What do I need to do?)	**Relook (Reflect and Check)**
1. Can I carry out my plan? 2. Can I show the steps correctly? 3. Can I show the steps clearly?	1. Does my method make sense? 2. How do I know? 3. Is my working/diagram/model accurate? 4. Have I checked my solution thoroughly using the COURT strategy?

Problem-Solving Approach: STAR

What is *COURT* ?

C – COPY; Copy data correctly

O – OPERATION; use the correct operation

U – UNIT; write the correct unit in the answer

R – REASONABLENESS; answer is reasonable

T – TRANSFER; answer correctly onto the answer space

Problem-Solving Approach: STAR

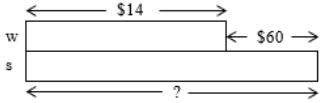
What is ***COURT*** ?

C – ***COPY:*** Copy data correctly
O – ***OPERATION***: Use the correct operation
U – ***UNIT:*** Write the correct unit in the answer
R – ***REASONABLENESS*** of answer
T – ***TRANSFER*** answer correctly onto the answer space

How to check your Mathematics solution.

Use ***COURT*** to check your working steps.

SAMPLE :
Claudia bought a water bottle and a school bag.
The water bottle cost $14 and the school bag cost $60 more than the water bottle.
How much did she pay for the school bag?



14 + 60

= **74**

C - COPY data correctly

O -OPERATION- Use the correct operation

R - Answer is REASONABLE as the printer should cost more than the laptop

T - TRANSFER answer correctly to the answer space

U-UNIT-Write correct unit

C	✓
O	✓
U	✓
R	✓
T	✓

Ans : $74

Problem-Solving Approach: STAR

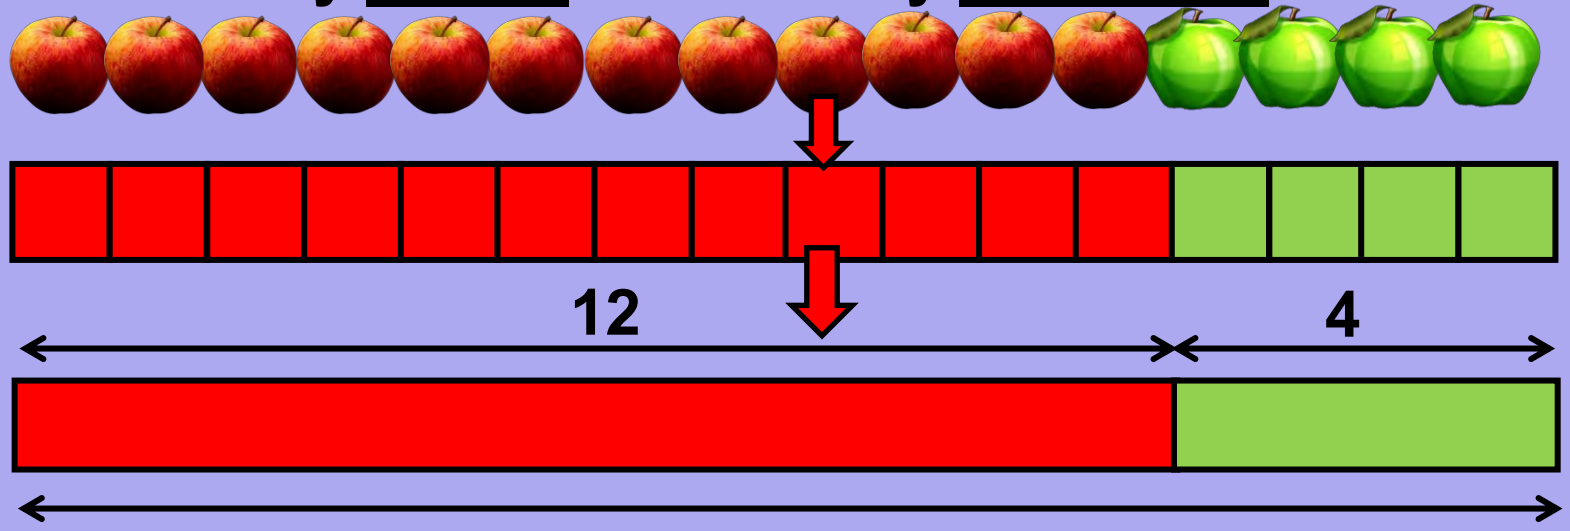
No.	Heuristics
1	Act it out
2	Look for pattern
3	Model Drawing - part - whole

Problem-Solving Approach: STAR

Part-Whole Model

Problem 1

Mother bought 12 red apples and 4 green apples.
How many apples did she buy altogether?



12 + 4 = 16

She bought 16 apples altogether.

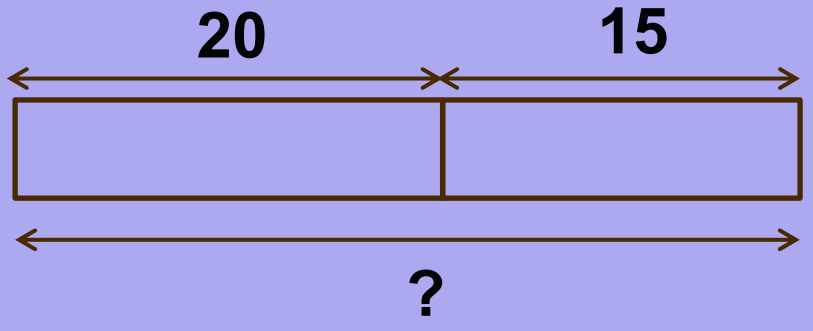
C	✓
O	✓
U	✓
R	✓
T	✓

Problem-Solving Approach: STAR

Part-Whole Model

Let's try this.

There are 20 red fishes and 15 green fishes in the tank.
How many fishes are in the tank altogether ?



20 + 15 = 35

There are 35 fishes in the tank altogether.

C	✓
O	✓
U	✓
R	✓

Homelink Pack

HOMELINK is a package designed to allow students to make use of class manipulatives at home to reinforce the concepts they have learnt in school. Parents are encouraged to play the games or do the activities at home with their children. The manipulatives are kept in their yellow button file before they bring it home. Students also learn to be responsible by keeping the manipulatives properly after use and returning them on time.

HOMELINK 1 – NUMBERS TO 10

Activity	Objective	Materials	Instructions	Pictures
1	• relate number of dots to corresponding numerals without counting	• 1 set of dot cards • 1 set of number cards	Number of players: 2 1. Place all the dot cards and number cards face down. 2. Player takes turn to flip over 1 dot card and 1 number card. 3. If the two cards match, the player keeps the cards. If not the player turn the card face down again. 4. Play continues until all the cards have been paired up. 5. The player with the most cards wins the game.	 Dot Cards  Number Cards
